Alberta's International Merchandise Exports
January - December 2006
Highlights

Overview: In 2006, the value of Alberta's international merchandise exports grew by 1.4% from 2005, to a record $81.3 billion. Nationally, exports advanced by 0.5% over the same period. Lower energy exports, as a result of a sharp drop for natural gas, were offset by gains in the manufacturing and agricultural sectors. Excluding mining and energy, exports increased 8.1%. Export volumes rose an estimated 4% in 2006, because of strong gains for crude oil, manufacturing, crops and cattle. In the fourth quarter, exports fell by 18.1% from the same period in 2005, due to price driven declines for natural gas. Excluding gas, Alberta exports rose 5.9% in the fourth quarter.

Major Commodities: In 2006, higher prices and volumes fuelled exports of crude oil, wheat, heavy oils (diesel and fuel oils) and acyclic hydrocarbons. Volume increases led to gains for propane, cattle, wheat, canola, polyethylene, ethylene polymers and coal. Nickel exports advanced on higher prices. Lower prices and volumes caused declines in shipments of natural gas, oriented strand board, boneless beef and lumber. Ethylene glycol exports fell because of lower prices.

Exports by Industry: *Mining and energy* exports fell by 1.4% because of lower natural gas shipments. In 2006, crude oil exports exceeded natural gas deliveries for the first time in a decade. *Primary agricultural* exports jumped by 46.5% because of higher exports of crops (+32.9%) and livestock (+105.2%). *Manufacturing* exports grew by 4.1% because of volume gains. Large export gains were noted for the chemical, machinery, and primary and fabricated metal product industries.

North America: U.S. imports of Alberta merchandise grew by 0.4%, primarily as a result of increases in crude oil and cattle imports. Large increases were also noted for ethylene polymers, polyethylene, acyclic hydrocarbons and heavy oils. Mexican imports climbed by 16.0% on increased shipments of wheat and ethylene polymers.

Asia: Exports to Asia rose 7.4% due to increased nickel, canola, coal, ethylene polymer and wheat deliveries. Exports to China were 7.8% higher because of higher shipments of nickel, ethylene polymers and cellulose acetates. Japan's imports from Alberta fell by 4.0% due to lower pork, lumber and ethylene dichloride. Shipments to India more than quadrupled because of large increases for wheat and electronic equipment.

Europe: European imports rose 4.8% on higher sales of canola oil, coal, and parts for drilling and surveying machinery. Exports to the Netherlands, Germany and the U.K. rose strongly, but large declines were noted for Belgium and Italy. In 2006, Alberta's top European markets were the Netherlands, the U.K. and Belgium.

Middle East and North Africa: Exports to the Middle East and North Africa increased sharply by 40.7%, due in large part to a jump in sales to the United Arab Emirates, Egypt and Iraq. Large export increases to the region were noted for wheat, canola, boring machinery and drilling derricks.

Other Regions: South American imports were 19.5% higher because of higher wheat exports to Peru and Venezuela. Central American imports grew by 7.1% as a result of higher diesel fuel sales to Guatemala. Exports to the Commonwealth of Independent States rose 22.9% as tanker trailer and oil and gas field equipment sales increased. A rise in canola and parts for compressors and pumps deliveries, especially to Australia, fuelled an 8.1% increase in imports by the Oceania region. Sub-Saharan Africa's imports climbed 17.0% because of increased shipments of wheat.

ALBERTA'S INTERNATIONAL MERCHANDISE EXPORTS

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, most of the natural gas exports assigned to Washington are destined for California.

* Exports to individual states can be seriously over- or under-stated because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, most of the natural gas exports assigned to Washington are destined for California.
